

Dredging Requirements within 200 feet of a dam

Unless otherwise approved in writing by the Bureau of Dam Safety and Flood Control (Bureau), no person shall dredge within 200 feet of a dam unless the following requirements are met:

1. A current inspection report should be on file with the Bureau.
2. A New Jersey licensed professional engineer experienced in the design and construction of dams must certify that dredging within 200 feet of the dam will not compromise its safety.
3. An engineering plan with appropriate specifications prepared by a New Jersey licensed professional engineer is to be submitted outlining the limit of disturbance, spoil locations, erosion and sediment controls, cross sections showing depths of dredging, and sequence of construction.
